Assets are managed through RFID beacons, notifications, efficient approval processes and effective analytics. WF-Goldgeek fully integrates with your organisational hierarchy to simplify storage as we know it!

WHY US?

- Automation for pledging and release of asset
- Security against thefts and mishaps
- Role based dashboards for management and approval processes
- Business Intelligence
- Fully integrated with your systems and customisable for your unique requirements

HOW WF-GOLDGEEK WORKS

Customer Details
Created

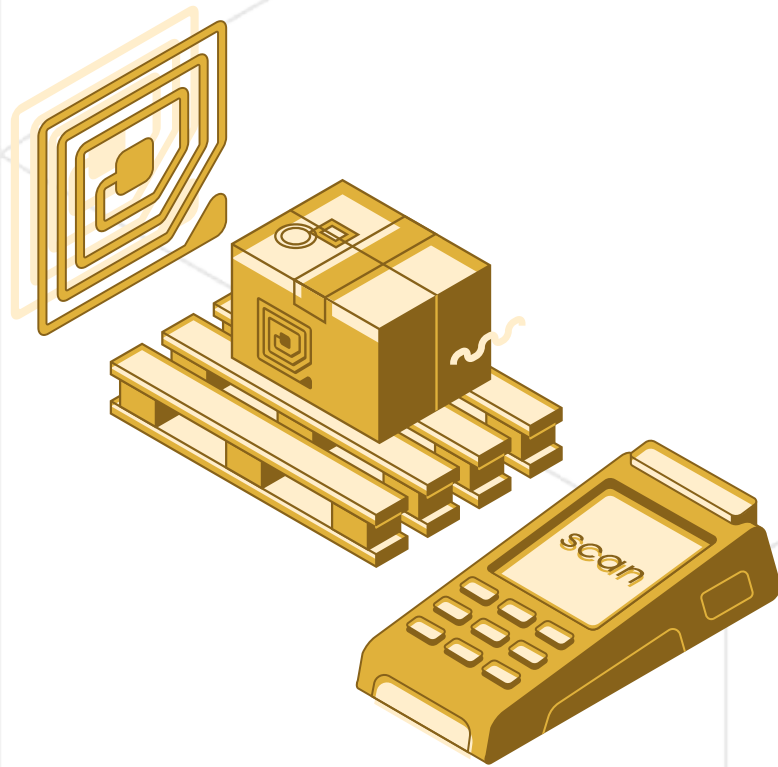

Asset placed on
Weighing machine

WF-GoldGeek
System automatically
reads weight and
assess the quality

HOW WF-GOLDGEEK WORKS

RFID/Beacon
tagged to the asset

Admin Manager seals
the asset and request
OTP to access the locker

OTP generated for
Admin Manager

HOW WF-GOLDGEEK WORKS

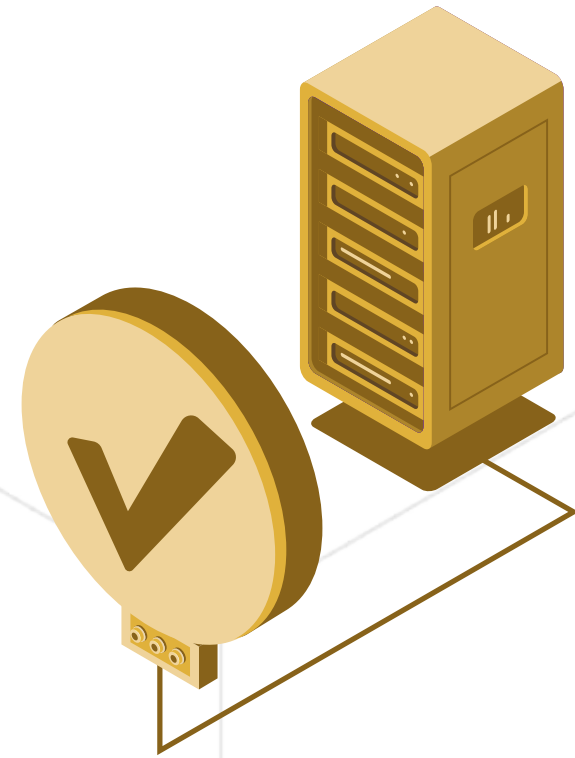

OTP generated for the locker

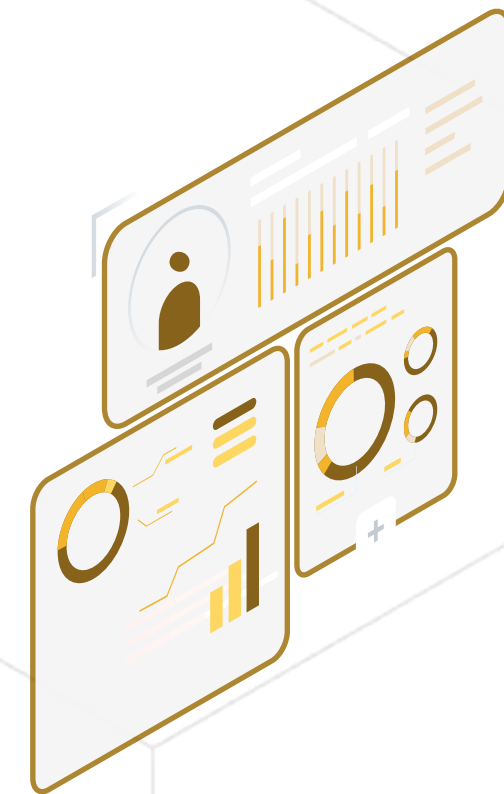

On matching OTPs, Manager opens WF-Locker to keep and lock the asset

HOW WF-GOLDGEEK WORKS

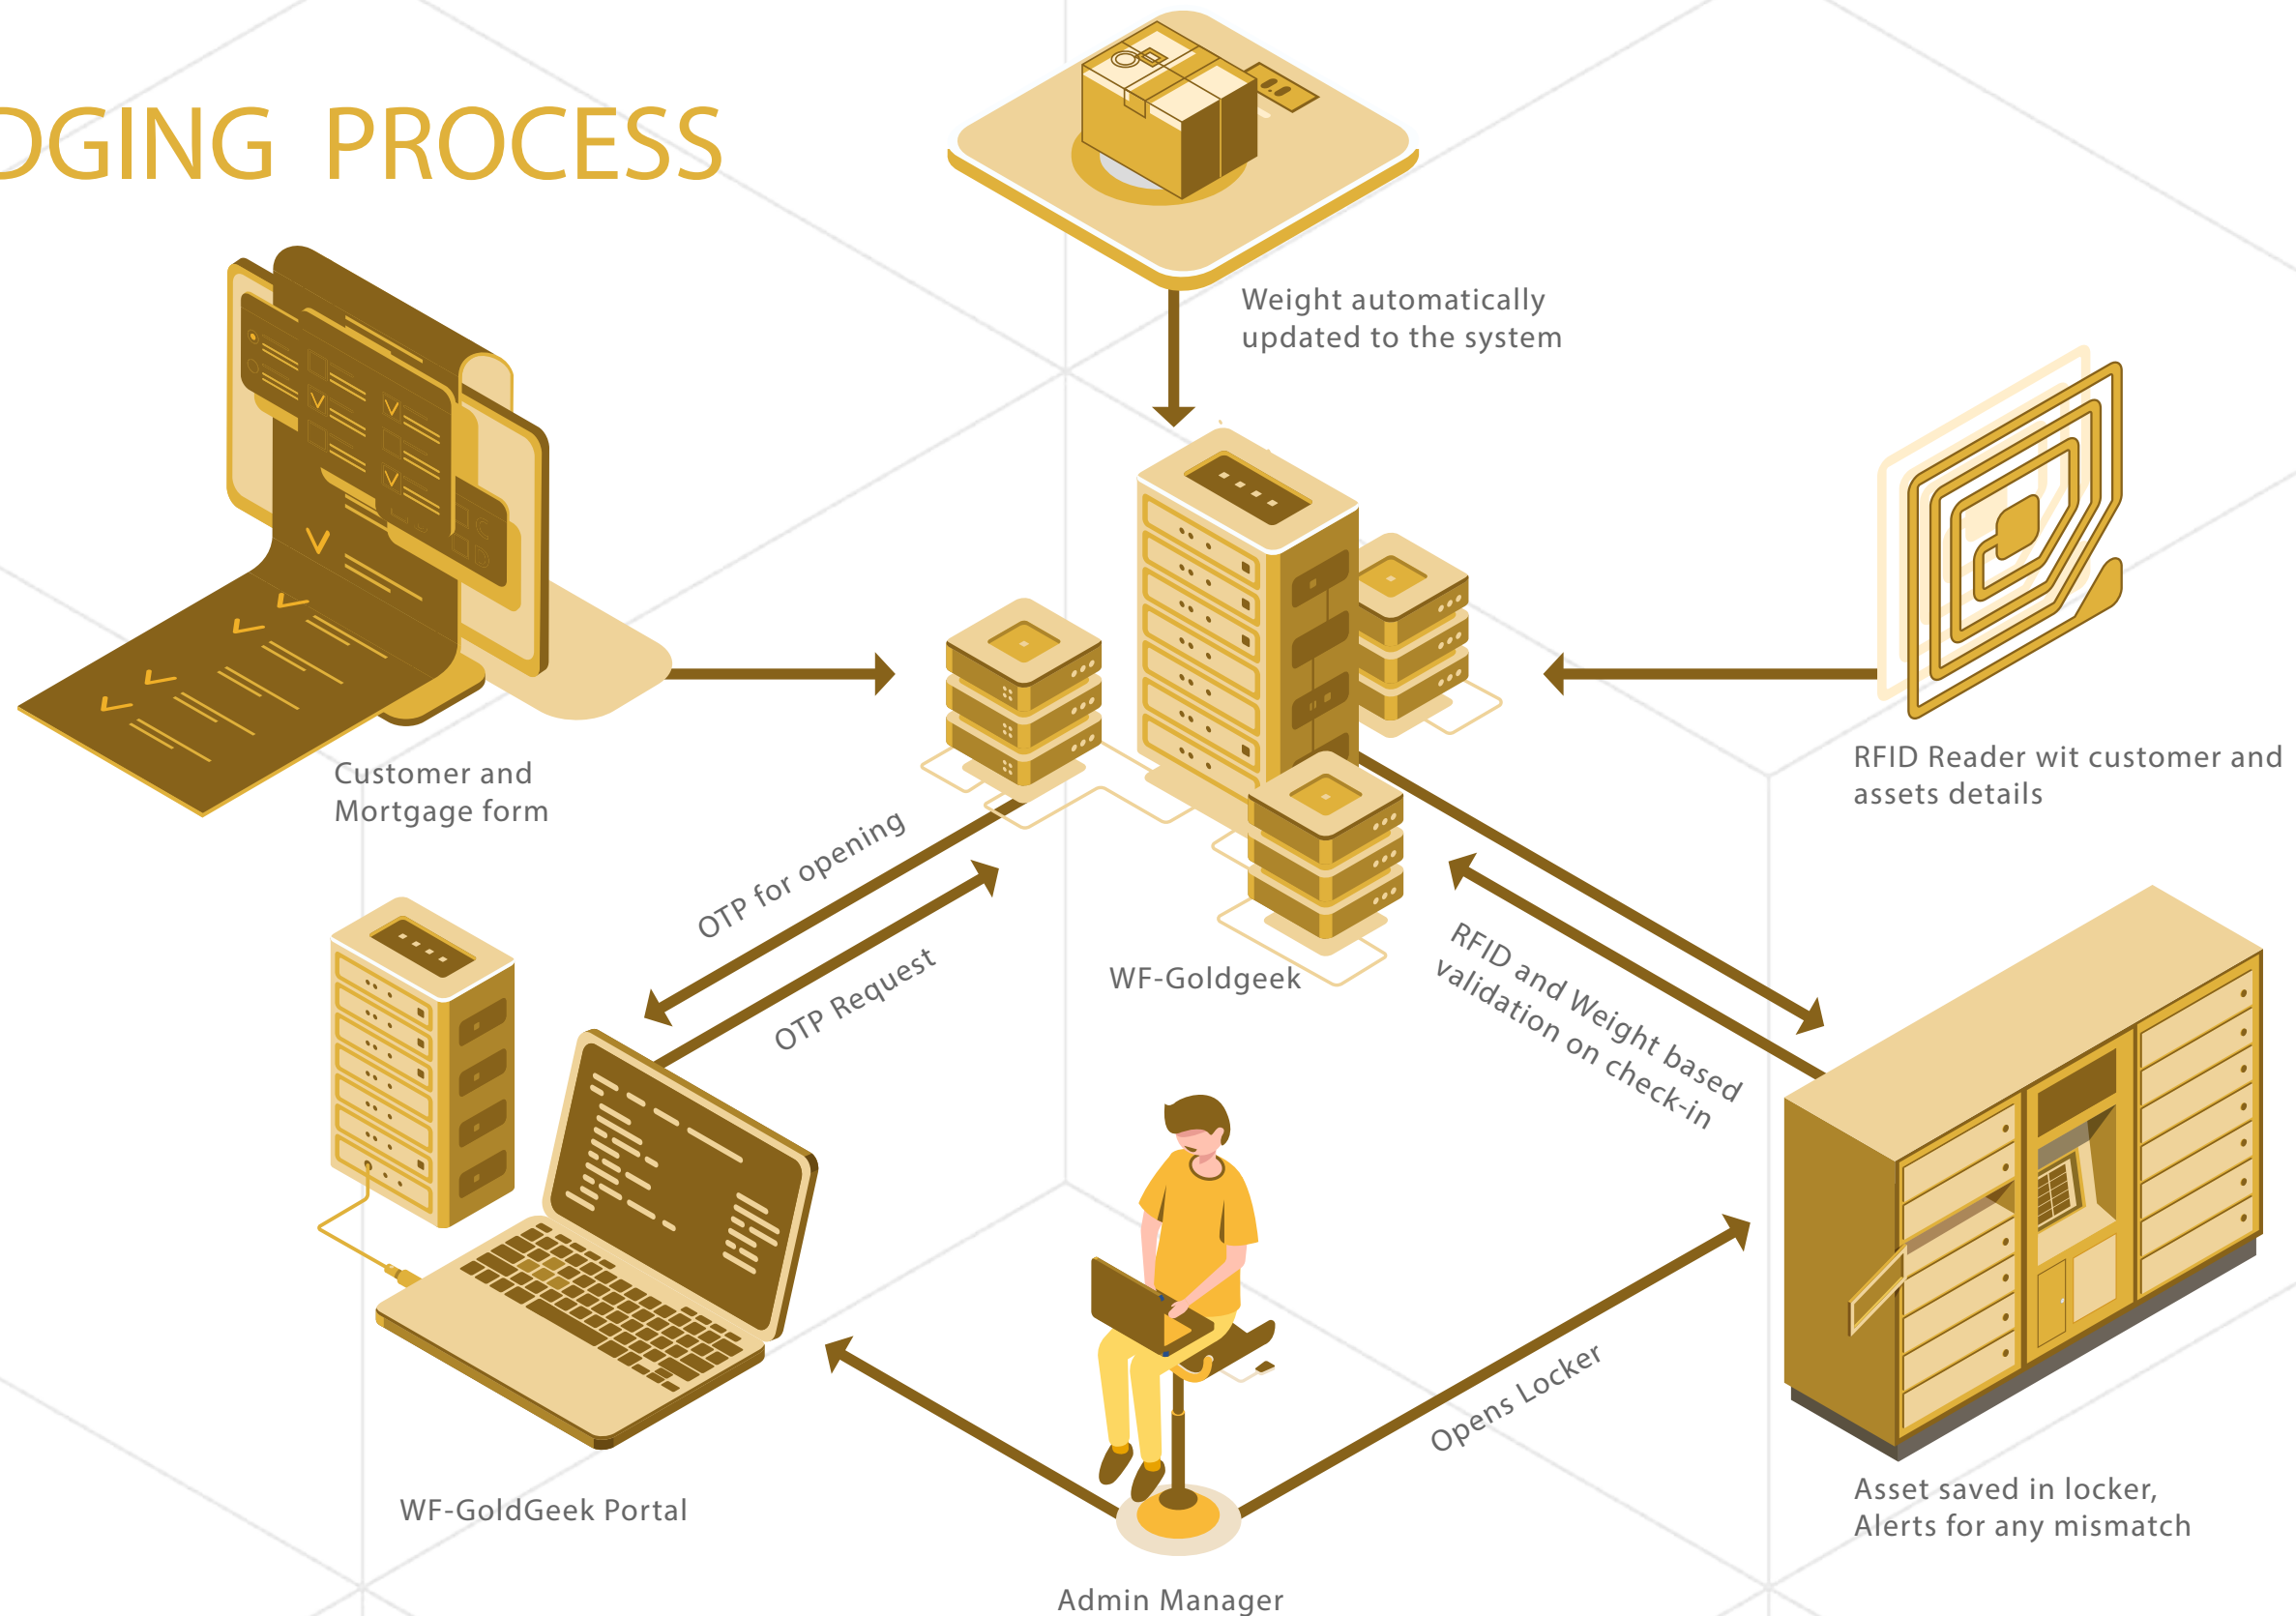

The WF-Locker reconfirms the asset and validate the check-ins and check-outs in the system using RFID and weight.

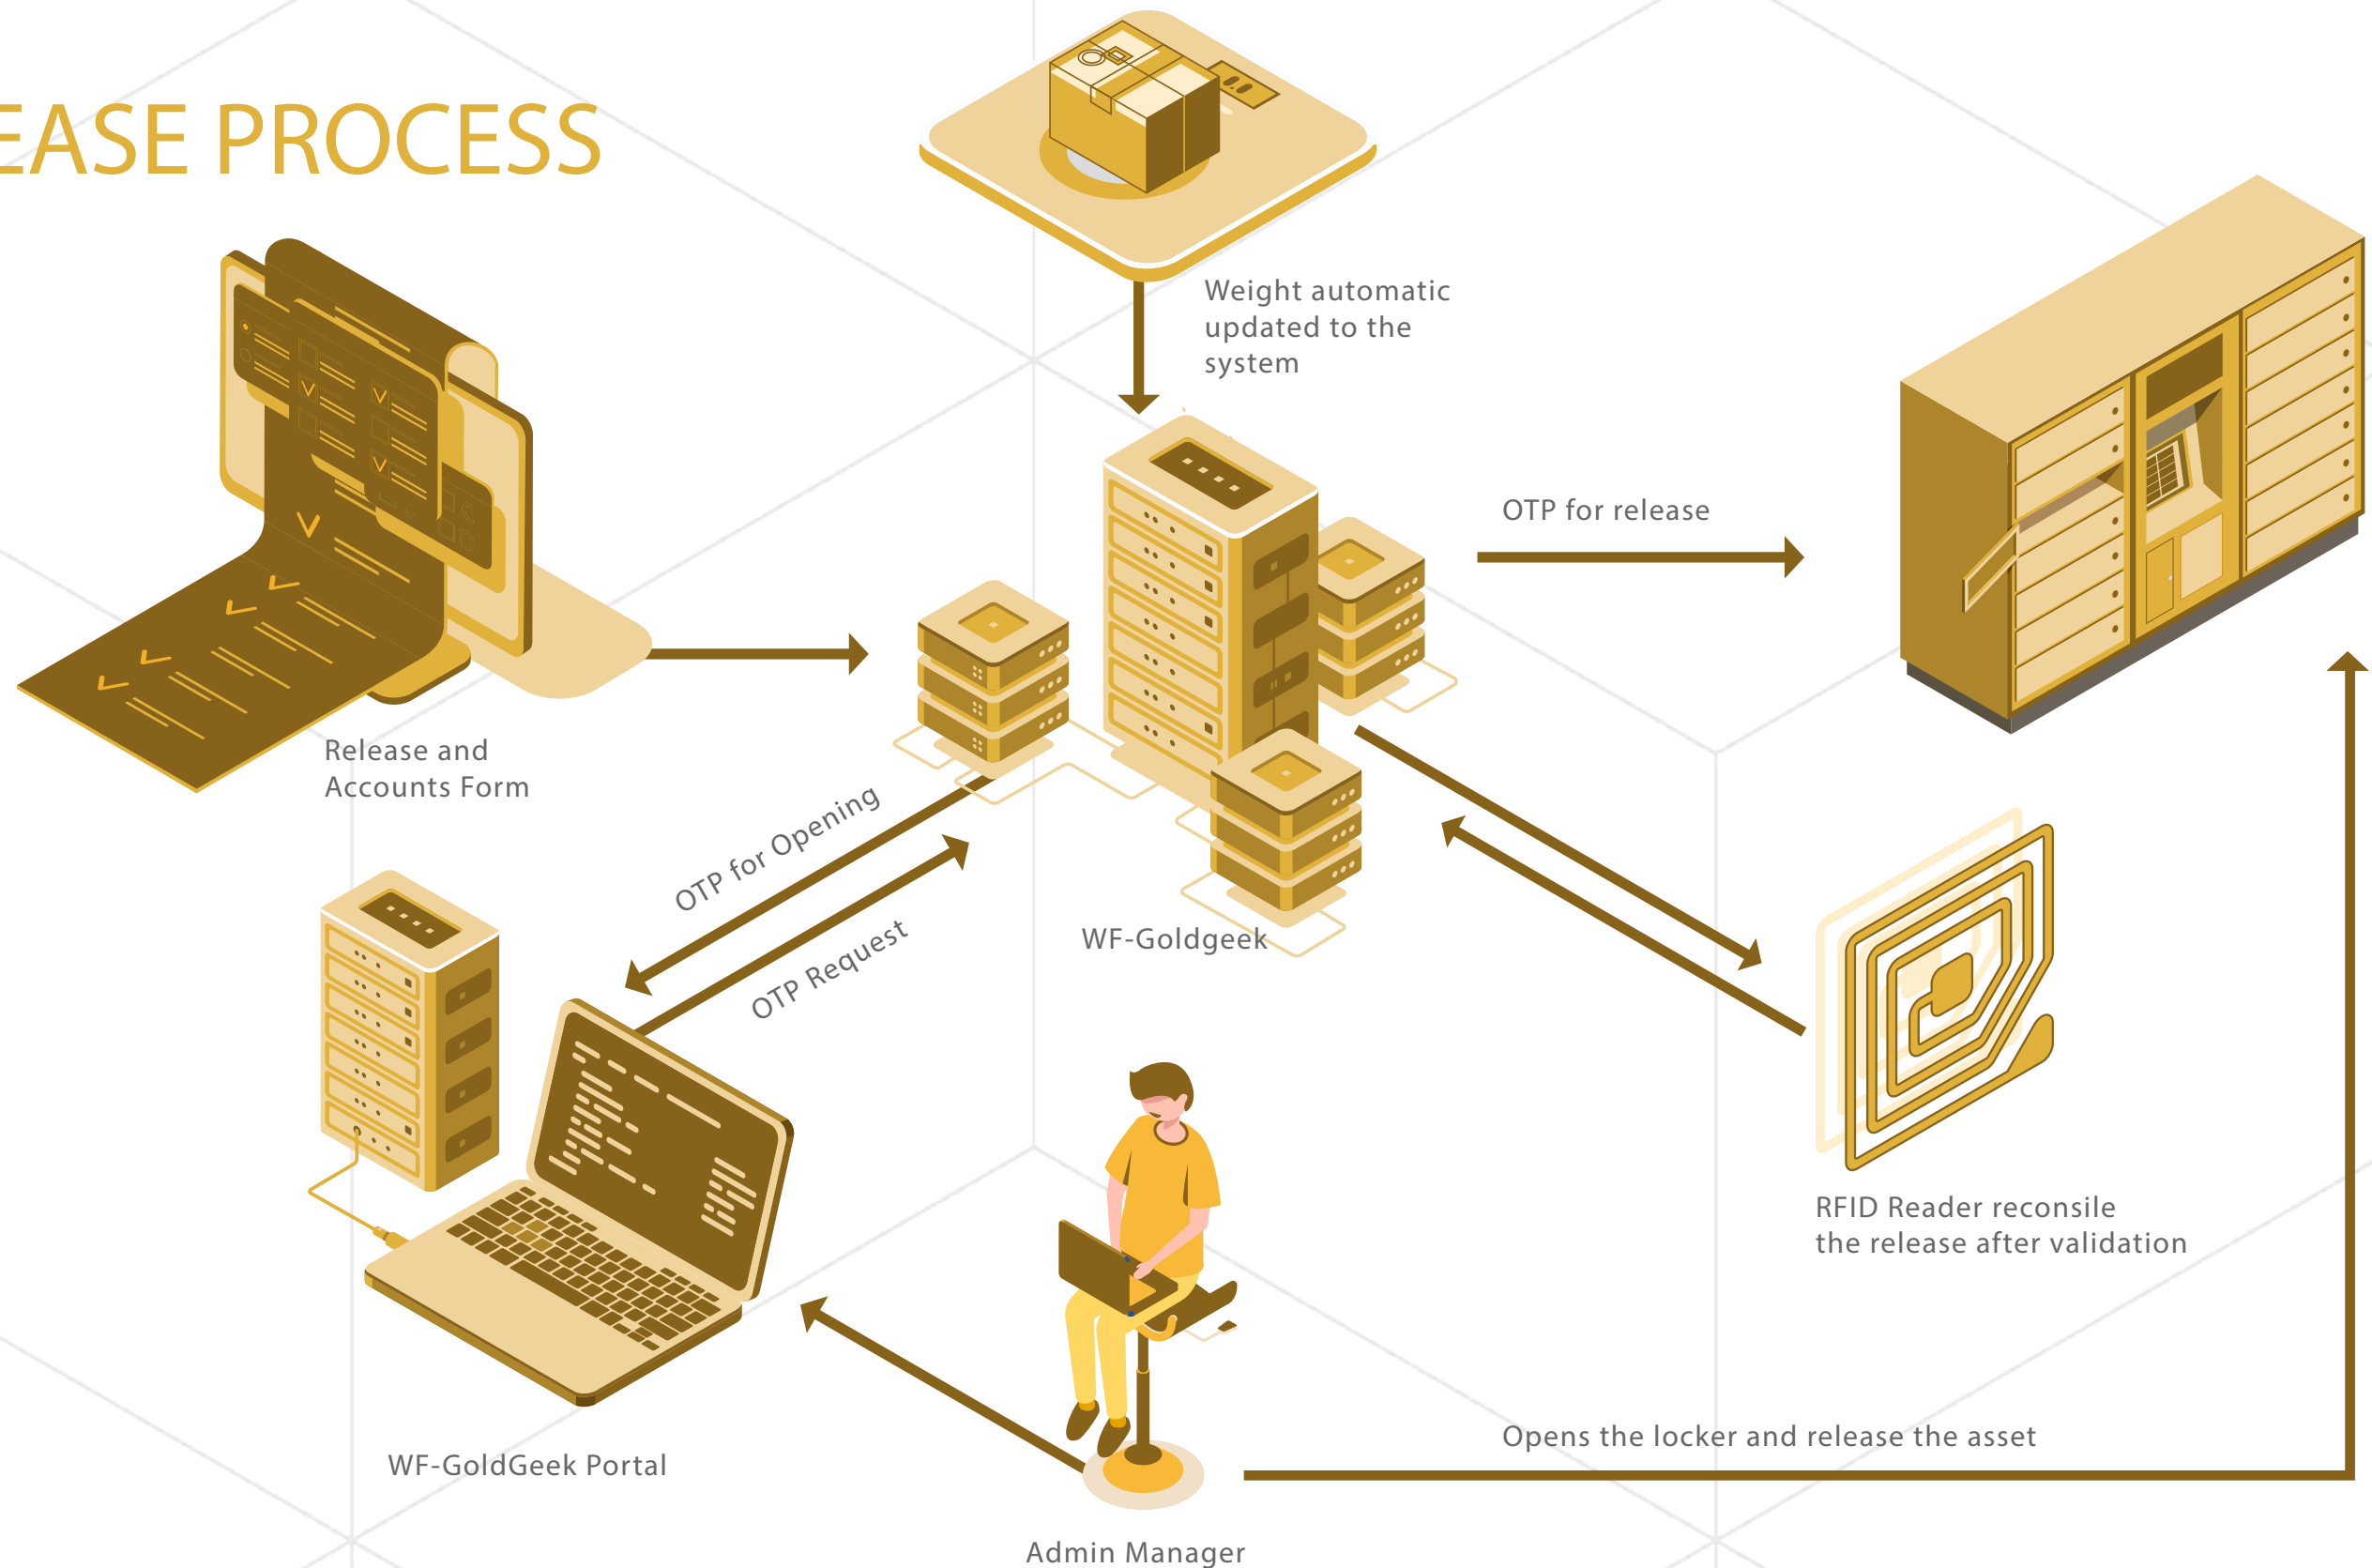

Reports, Analysis, Notifications, Optimization and predictions through AI for business growth

A simple and effective validation process in place for any check-ins and check-outs. The possibility of entering single or multiple customers assets at any time intervals makes WF-Goldgeek your flexible partner.

PLEDGING PROCESS

RELEASE PROCESS

THE OUTCOME

With WF-Goldgeek, the entire process of storage and security is made effective and smart.

With analytics and actionable predictions WF-Goldgeek makes your business ready for the future.
